

# Humidity Control System

for hair tress  
measurement  
& conditioning

Plug &  
Play

Bolero Lite  
compatible

Software controlled  
humidity settings

Humidity has a remarkable bearing on hair quality. To measure the impact of a product in a wide range of climates as well as to insure test repeatability it is necessary to control humidity. Our see-through box and controller were designed with cosmetic professionals for cosmetic professionals. Together they provide an easy-to use solution for conditioning hair tresses in a humidity controlled environment and performing time lapses and other live measurements.

Controller

Humidity Box

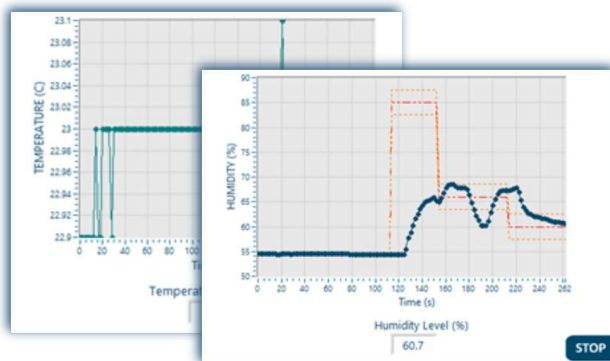

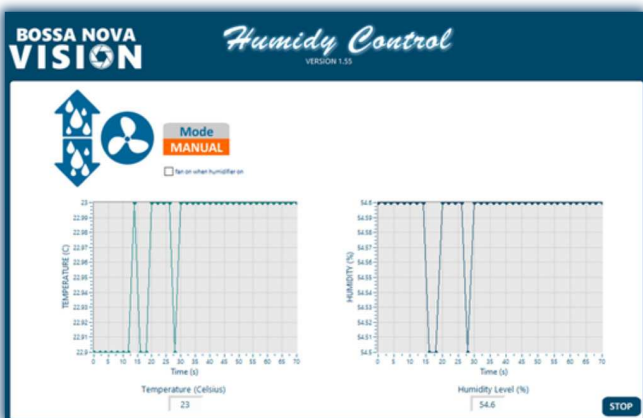

By removing the front window, the BOLERO Lite can easily be integrated into the Humidity box, allowing simple volume and fly-away / frizz measurements in a humidity controlled environment. Time lapses for humidity control product evaluation and set relaxation experiments are acquired in only one click.
